Summary

Experienced Frontend Developer with expertise in React, Next.js, and Redux. Skilled in building scalable, AI-driven platforms across HR, finance, and travel domains. Proficient in resolving complex UI issues, creating reusable components, and integrating third-party APIs. Known for delivering polished user experiences and optimizing performance in fast-paced, collaborative environments.

Experience

Mar 2025–Present

Sr. Frontend Developer, *Fincoopers Capital Pvt Ltd*, Indore, India
- Led the architecture and development of HR and Career portals using Next.js, MUI, and REST APIs.
- Built a dynamic job posting system with RBAC authentication, auto JD generation, configurable screening criteria, and predefined interview rounds—streamlining hiring from the start.
- Developed an Interview Monitor to manage candidate profiles, schedule interviews (walk-in, call, online), and integrate calendar views with AI-powered resume parsing and JD-based shortlisting.
- Delivered a dynamic Career Portal with job listings, detailed JDs, and multi-step applications, fully integrated with AI-based resume screening and evaluation.
- Created a custom mail template module enabling HRs to build reusable templates with dynamic fields and send personalized emails. Maintained clean component structure, optimized performance, and seamless UX across the recruitment lifecycle.

Jan 2024–Feb 2025

Software Development Engineer, *Dice Enterprise*, Pune, India
- Built dashboards and reports for IDFC's expense management platform, while identifying and fixing key bugs in transaction workflows and reporting pipelines.
- Developed modules for Yes Bank's utility management system, optimized BBPS workflows, and implemented a support ticketing system for corporate and super admin queries.
- Led the frontend redesign and integration of MakeMyTrip's (MMT) B2B travel platform—building modern interfaces for dashboards, expense cards, vouchers, and expense creation, while integrating their booking engine to support approval flows, automated bookings, and real-time status tracking.
- Resolved critical frontend and UX issues across platforms including IDFC, Yes Bank, and MMT, with primary focus on stabilizing ClearTrip's travel module.

Jun 2023–Dec 2023

Frontend Engineer, *Geniehub Solutions Pvt Ltd*, Remote
- Developed the UI of a job-seeking platform using React and Tailwind CSS, translating Figma designs into responsive, production-ready components.
- Implemented client-side routing, form handling, and component-based state logic to deliver a smooth user experience throughout the application flow.

Education

2022–2024   **MCA, CGPA: 8.31**, *SGSITS*, Indore, India

2019–2022   **BCA, CGPA: 8.9**, *Dr. C.V. Raman University*, Khandwa, India

Skills

Frontend	React.js, Next.js, Vue.js, Redux, React Router,RESTful APIs
Styling	Tailwind CSS, MUI, Shadcn/UI, HTML5, CSS3
Tools	VS Code, Git, GitHub, GitLab, Jira, Monday.com, Zoho
Languages	JavaScript, Python, Java, C++, SQL

Strengths

Collaboration	Effective team player with experience in agile environments and tools like Git and Jira.
Problem Solving	Skilled at debugging UI issues and quickly adapting to new technologies.
